

The Rotaid 24/7 5 year total package

Get set to rescue

24/7
SET TO RESCUE

- ✓ **You are always 100% prepared for a sudden cardiac arrest.**
- ✓ **You maximize the chance of saving a life.**
- ✓ **You minimize the effort of owning an AED.**

Always a fully operational AED

Special technology in the Rotaid cabinet monitors your AED and cabinet 24 hours a day. Self-test failures from your AED are immediately detected and forwarded via SMS and E-mail. The expiration dates of your AED, battery and electrodes are automatically monitored and you are informed in advance if action is required.

Always have your response team ready

When the Rotaid 24/7 cabinet is opened, it immediately and automatically sends an email or SMS to you and the emergency responders that are appointed. They are immediately alerted and mobilized.

Always available

The Rotaid 24/7 cabinet allows you to install your AED in public spaces. The dust and waterproof construction protects your AED from all forms of precipitation. In addition, the fully automatic heating system keeps your AED frost-free during the winter. The AED is always connected via its own mobile internet connection.

Always findable

The distinctive LED lighting and round shape ensures your AED is quickly found, even during the darker hours of the day. The integrated GPS system plots the location of the AED into the dashboard, allowing for online findability of your AED. When the cabinet is moved, it will automatically update its location.

Always accessible

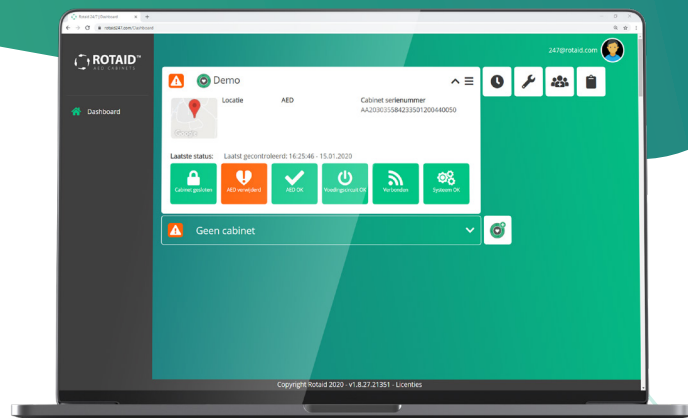

Via the Rotaid 24/7 online dashboard you can always access your AED cabinet. You can assign first responders, connect service employees or adjust the configuration.

The Rotaid 24/7 dashboard

Arrange it quickly and easily with 100% reliability

Via the online dashboard you can access your AED cabinet(s) at any time. Organize maintenance and responder teams, manage your notifications and adjust and change your life saving system.

Accessible and safe

The dashboard is always accessible via your PC, laptop, mobile phone or tablet. Through a secure login you can access it day and night. And your data is securely stored and in full compliance with legislation and your privacy.

Check the status of AED online

Your AED is continuously monitored for functionality and availability. If the AED requires service or reports a defect, the appointed person will be notified immediately. Your Rotaid 24/7 cabinet will indicate when actions are needed. Therefore, there is no more need to physically visit your AED.

Appointing and alerting first responders

With the Rotaid 24/7 dashboard you define your own team of responders per cabinet. They automatically receive an SMS or E-mail when the cabinet is opened and the AED is removed.

Connected to local emergency services

The advanced dashboard allows for connecting your AED to third party websites and systems, allowing for integration of your equipment in existing platforms and structures

Assign your maintenance team

Make it easy to maintain your AED by appointing the right people, that will be automatically notified in case of maintenance or error messages from the AED. They are informed at once when their actions are required and are able to report what actions have been taken.

Change your set-up

Are you planning to change your AED? Do you wish to adjust your alarm and lighting settings? During the lifespan of the 24/7 cabinet, you can change to any configuration you prefer and as often as needed. The platform will adapt to your changing needs at the touch of a button.

Keep track, report and document

The dashboard keeps detailed reports of your AED and events. Download the logfiles in PDF or Excel, select the timeframe you prefer and share these with your team or management. Assign co-administrators and make them part of your management system.
